Supplementary Fig. 2. Primer screening result of primer set for detection of *Botryosphaeria dothidea* (A) and *Diaporthe eres* (B), respectively. Gel electrophoresis of recombinase polymerase amplification products (upper panel) and conventional polymerase chain reaction products (lower panel). Lane 1, *B. dothidea*; lane 2, *D. eres*; lane 3, *Botrytis cinerea*; lane 4, *Alternaria alternata*; lane 5, *Pestalotiopsis* sp.; N, no DNA input; M, DNA ladder.
