

**Supplementary Fig. 2.** Bacterial growth assay in *WRKY55-OE Arabidopsis* plants upon *Xanthomonas campestris* pv. *campestris* (*Xcc*) or *Pseudomonas syringae* pv. *tomato* DC3000 (*Pst* DC3000) infection. Six-week-old Col-0, *WRKY55-OE*, and *wkry55-1* plants were inoculated either with *Pst* (A) or *Xcc* (B) by hand infiltration. Bacterial growth was monitored at the indicated day post-inoculation.
